schema.org

The Type Hierarchy

Here is the entire hierarchy in a single file.

Types that have multiple parents are expanded out only once and have an asterisk

DataType
        Boolean
        Date
        DateTime
        Number
                Float
                Integer
        Text
                URL
        Time

Thing: additionalType, alternateName, description, image, name, sameAs, url
        Action: agent, endTime, instrument, location, object, participant, result, startTime
                AchieveAction
                        LoseAction: winner
                        TieAction
                        WinAction: loser
                AssessAction
                        ChooseAction: option
                                VoteAction: candidate
                        IgnoreAction
                        ReactAction
                                AgreeAction
                                DisagreeAction
                                DislikeAction
                                EndorseAction: endorsee

                                LikeAction
